

Linda Schönfeldt

UX-minded Frontend Developer

SUMMARY

Frontend developer with a background in Interaction Design and UX research. I build accessible, user-focused interfaces in React and TypeScript, and combine hands-on development with user interviews, prototyping and testing. Looking for a frontend role close to design, ideally within healthtech, mental health or women's health.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Chakra UI, Styled Components, Zustand, Vite

Backend & tools: Node.js, Express, REST APIs, Supabase, MongoDB, Git/GitHub

UX & design: Figma, user interviews, usability testing, user flows, wireframing, prototyping, accessibility (WCAG)

Ways of working: Agile, cross-functional collaboration, workshop facilitation

AI tools: GitHub Copilot/Claude Code for code generation, ChatGPT/Claude for research and documentation

EDUCATION

Web Development Bootcamp

Technigo · January 2025 – October 2025

JavaScript, React and Node.js, with a focus on accessible, user-friendly solutions.

Bachelor's Degree, Computer and Systems Sciences

Stockholm University · 2021 – 2024

Specialization in Interaction Design. Thesis on how dark patterns in social media apps undermine user autonomy.

PROFESSIONAL EXPERIENCE

Frontend Developer, Freelance

Billig Bokförlag · November 2025 – December 2025

- Built a responsive website from scratch for an accounting firm serving Swedish small businesses, using React, TypeScript and Chakra UI
- Developed an order form with real-time price calculation and automatic discount logic
- Structured the site for clarity and SEO, with transparent pricing and easy navigation

Frontend Developer, Internship

FIXMEAPP (via Technigo), Remote · September 2025 – October 2025

- Implemented and refined reusable UI components with React, Next.js and Tailwind CSS
- Worked in short feedback loops to improve usability and consistency
- Contributed to a more consistent and maintainable frontend in an early-stage startup

UX/UI Designer, Internship

Univid, Stockholm · November 2023 – May 2024

- Designed user-centered prototypes for a B2B webinar platform
- Planned and conducted user interviews and usability tests to inform product decisions
- Worked closely with developers in an agile, interdisciplinary team to deliver designs ready for implementation

PROJECTS

Paired

React, TypeScript, Supabase, Tailwind CSS · In active development

A shared space for couples with a joint calendar, shared lists and a personal feed. Built from scratch with authentication and invite links.

Lowering the Threshold to Psychological Care

UX case study · Healthtech · Figma

Self-initiated concept redesign of Din Psykolog's onboarding, exploring how guided matching, experience-based language and delayed commitment can make seeking care feel safer.

ADDITIONAL EXPERIENCE

Gardener

Olssons Trädgårdstjänst · June 2026 – July 2026

Maintained outdoor areas for several housing associations, including pruning, weeding and general plant care.

Volunteer

Mind · October 2023 – October 2024

Chat-based mental health support for young people, with a focus on empathy and active listening.
